The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

Invesco Pan European High Income, Global Income, Global Total Return (EUR) Bond, Euro Corporate Bond, Environmental Climate Opportunities Bond and Sustainable Global Income funds

Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date.

Changes in interest rates will result in fluctuations in the value of the fund.

The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund.

The fund may invest in distressed securities which carry a significant risk of capital loss.

Invesco Pan European High Income, Global Income, Global Total Return (EUR) Bond, Environmental Climate Opportunities Bond and Sustainable Global Income funds

Investments in debt instruments which are of lower credit quality may result in large fluctuations in the value of the fund.

Invesco Pan European High Income, Euro Corporate Bond, Environmental Climate Opportunities Bond and Sustainable Global Income funds

The fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

Invesco Global Income and Global Total Return (EUR) Bond funds

The fund may invest extensively in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

Invesco Pan European High Income, Global Income, Global Total Return (EUR) Bond and Environmental Climate Opportunities Bond funds

The Fund may invest in a dynamic way across assets/asset classes, which may result in periodic changes in the risk profile, underperformance and/or higher transaction costs.

Invesco Environmental Climate Opportunities Bond Fund

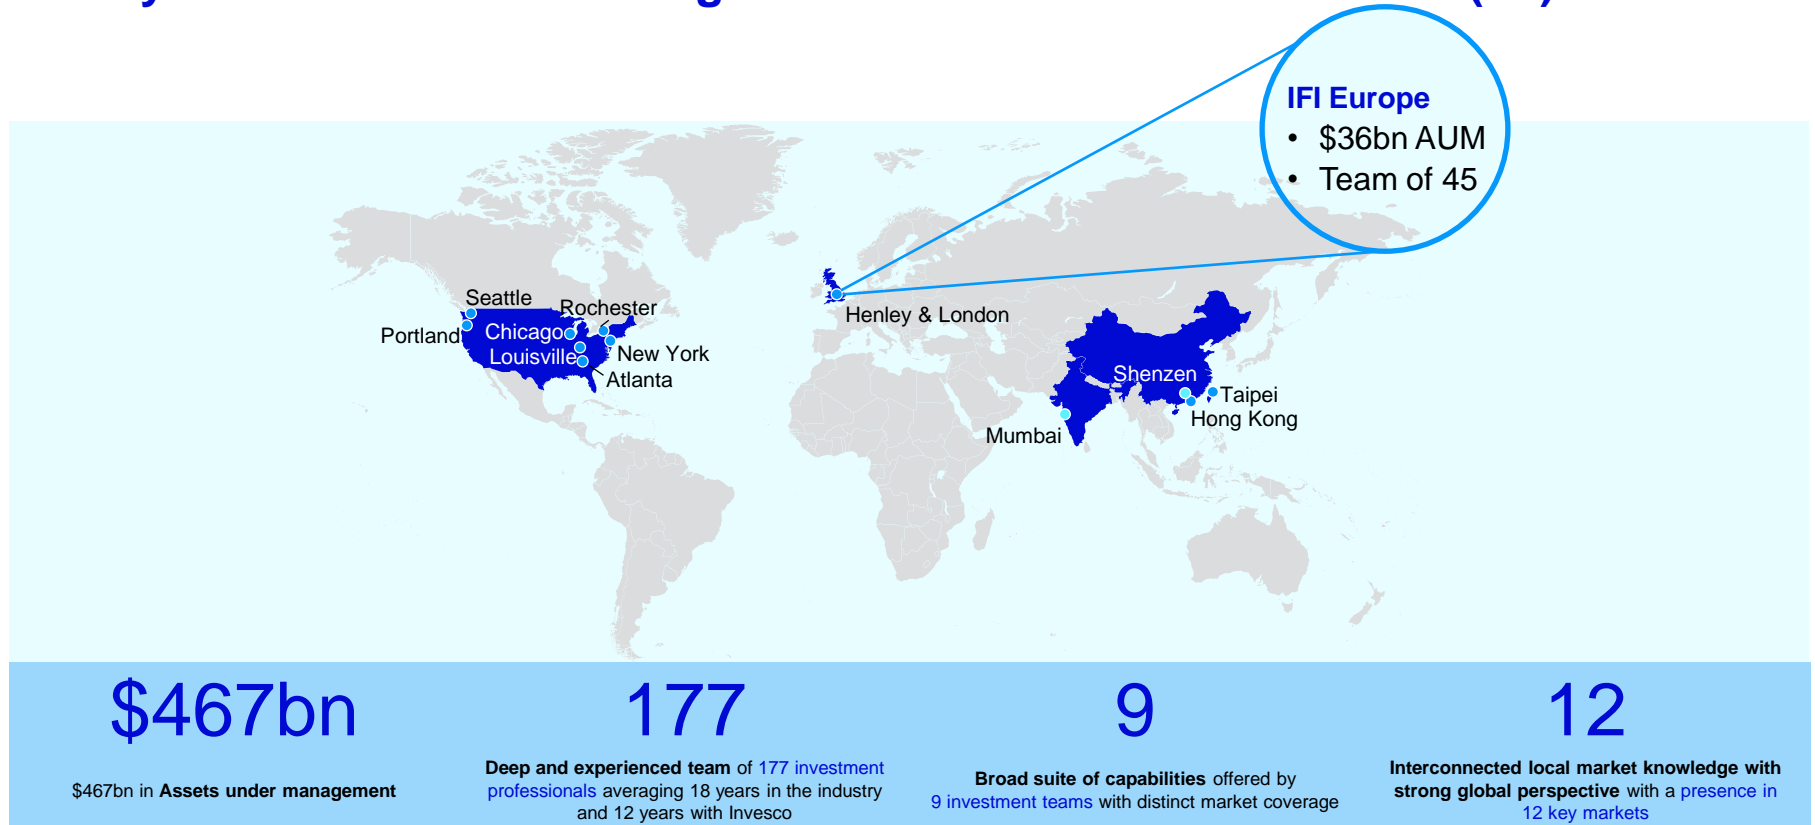

As a portion of the Fund may be exposed to less developed countries, you should be prepared to accept large fluctuations in the value of the Fund.

Invesco Environmental Climate Opportunities Bond and Sustainable Global Income funds

The lack of common standards may result in different approaches to setting and achieving ESG objectives. In addition, the respect of the ESG criteria may cause the Fund to forego certain investment opportunities.

The fund may invest in certain securities listed in China which can involve significant regulatory constraints that may affect the liquidity and/or the investment performance of the fund.
