## Investment Risks

For complete information on risks, refer to the legal documents.

The value of investments and any income will fluctuate (this may partly be the result of exchange-rate fluctuations) and investors may not get back the full amount invested. Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date. Changes in interest rates will result in fluctuations in the value of the fund. The fund uses derivatives (complex instruments) for investment purposes, which may result in the fund being significantly leveraged and may result in large fluctuations in the value of the fund. The fund may invest in distressed securities which carry a significant risk of capital loss. The fund may invest in contingent convertible bonds which may result in significant risk of capital loss based on certain trigger events.

## Monthly Report December 2024 (covering November)

This marketing communication is exclusively for use by Professional Clients, Financial Advisers and Qualified Clients/Sophisticated Investors. This document may also be used by financial intermediaries in the United States. This is not for consumer use, please do not redistribute. Investors should read the legal documents prior to investing.

## Summary of fund objective

The Fund is actively managed. The Fund aims to achieve a combination of income and capital growth over the medium to long-term. The Fund seeks to achieve its objective by investing primarily in debt securities denominated in Euro issued by corporate issuers. The investment concerns the acquisition of units in a fund and not in a given underlying asset.

## Fund Performance

The Invesco Euro Corporate Bond Fund returned 1.42% in November 2024. This placed the fund in the fourth quartile of its peer group, the EAA Fund EUR Corporate Bond sector, which returned 1.46%. The 85% ICE BofA Euro Corporate Index (Total Return) and 15% ICE BofA Euro High Yield Index (Total Return) benchmark returned 1.48%. Benefiting from markets pricing in the possibility of a 0.50% interest rate cut from the European Central Bank in December to shore up economic growth, duration was the main driver of performance. With spreads tightening, credit had a negative impact on returns with corporate hybrids and high yield bonds the largest detractors. Over longer time periods of 3, 5 and 10 years, the fund is first quartile.

## Fund Positioning

The fund holds a diversified portfolio of investment grade corporate bonds, with an allocation to subordinated financials, corporate hybrid bonds and non-investment grade corporate bonds. During November we participated in new issues from WP Carey, BP, FDJ and Heimstaden. In the secondary market, we added Nordea Bank, Charter and National Grid. We sold ABN Amro, Broadcom and Bristol Myers Squibb. The biggest allocation by sector remains financials with a third of the fund held in banks and insurance companies. Around 5% of the fund is held in US dollar denominated bonds. The currency exposure from these positions is hedged back to euros. The fund's modified duration was marginally increased from 4.9 to 5.0 over the month. For comparison, modified duration for the broader market (as measured by the ICE BofA Euro Corporate Index) remained unchanged at 4.5.

## Outlook

We believe that it's still a bond-friendly backdrop and a good time to hold high-quality fixed income assets. Price pressures are abating in the eurozone and the European Central Bank has cut interest rates three times in the current easing cycle with further reductions expected over coming months. Despite this more dovish monetary backdrop, the economies in Europe appear sufficiently resilient to avoid recession although economic growth momentum is moderating in some areas. Bond market yields are attractive and the fund is taking advantage of these, especially in the new issuance market. However, we also need to consider the relatively low credit spread the market is trading on.
