# Invesco Pan European Equity Fund Overview

Past performance does not predict future returns.

1. **Quality transition:** A rigorous focus on investing in **companies changing for the better** that can offer good **future value**
2. **Alpha generation:** Supported by **low expectations**, **historically low valuations** & yet **improving macro-economics** and **normalising interest rates**
3. **Diversification:** An alternative approach to active investing that delivers a highly **diversified portfolio**

Source: Invesco as at Q2 2024.

Data shown refers to the Gross Performance (£) of the Invesco Pan European Equity Fund since John Surplice joined the fund – July 2003. € Net return data for the MSCI Europe and MSCI Europe Value has been provided. Provided on a quarterly basis.

The benchmark index is shown for performance comparison purposes only. The Fund does not track the index.

# Invesco Pan European Equity Fund

## Stock Specific Alpha Generation + Value Exposure

Past performance does not predict future returns.

**Annualised 3-year Gross performance to 30 June 2024 broken down into idiosyncratic alpha & positive returns from our value tilt**

As the Fund is actively managed, it is not intended that the performance of the Share Class will track performance of MSCI Europe Index (Net Total Return) (the "Benchmark"). The gross performance figures are shown in EUR, inclusive of re-invested income, gross of ongoing charges and net of portfolio transaction costs. Index: Net return in EUR. Please see Net Performance slide for the impact of ongoing charges. \*We calculate our return from our value tilt by regressing the monthly gross returns of the fund to the MSCI Europe Value Index. This generates a beta to value for the fund, which is then applied to the MSCI Europe Value Index returns each month. The resulting monthly figures are then compounded for the entire period and annualized. The idiosyncratic alpha is the residual return once the value contribution is deducted from the total annualized excess gross return. The Fund is not managed by reference to a benchmark. The investment concerns the acquisition of units in an actively managed fund and not in a given underlying asset. Costs may increase or decrease as result of currency and exchange rate fluctuations. Consult the legal documents for further information on costs. As at Q2 2024.

# Invesco Pan European Equity Fund

## Significant Diversification

The Invesco Pan European Equity Fund has very low correlation to the other major global indices

	MSCI Europe	Invesco Pan European Equity Fund	S&P 500	Japan	China
MSCI Europe		81%	38%	22%	6%
Invesco Pan European Equity Fund	81%		17%	15%	6%
S&P 500	38%	17%		29%	0%
Japan	22%	15%	29%		2%
China	6%	6%	0%	2%	
3 yr daily Volatility (1 std devn, annualised)	14.0%	15.6%	17.0%	16.7%	28.5%
3 Yr Total Return	24.9%	24.9%	45.5%	18.3%	-38.7%
Annualised	7.7%	7.7%	13.3%	5.8%	-15.1%

Source: Invesco, Factset as at Q2 2024.

Sector Exposures: Invesco Pan European Equity Fund vs MSCI Europe vs S&P 500

# Quality Transition

# Investment philosophy and key values

## Investment philosophy:

We believe the market struggles to value companies undergoing transition. Our success comes from exploiting **valuation anomalies** where there is the **potential** and **willingness to change for the better**. This requires a combination of **rigorous investment analysis, discipline, patience** and **engagement**. All these elements are equally applicable to our ESG integration.

## Key values:

### Potential and willingness to pursue quality change

- Correctly anticipating material changes and the likelihood of these changes coming to fruition is key in delivering strong returns.

### Rigorous investment analysis and discipline

- To be successful requires an in-depth understanding of company and industry fundamentals as well as being prepared to invest for the long term.

### Engagement, collaboration & challenge

- Engaging with companies is a critical component in understanding change. Collaboration and challenge are key to how we engage as a team.

For illustrative purposes only.

# 3 potential ways to make money in equities...

...We prioritise #2

## Compounders:

“great that stays great”

- 1<sup>st</sup> quartile companies that remain 1<sup>st</sup> quartile
- High hit rate
- Supported by low rates
- Crowded style

#1

## Quality transition:

“good to great”

- Quality improvement/change
- Lower hit rate. Greater engagement required
- Proven Alpha
- ‘Differentiated’ style

#2

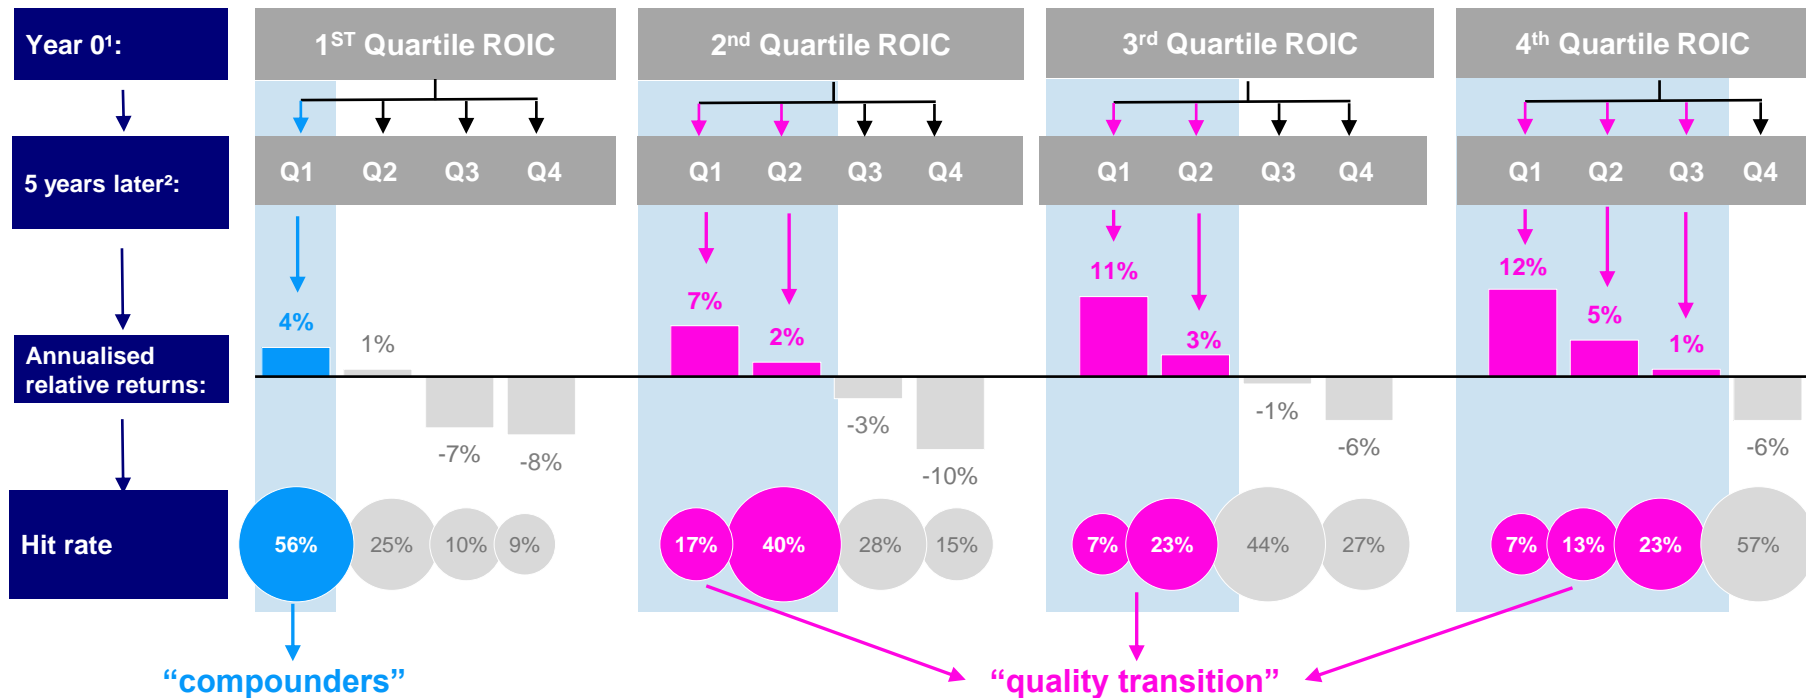

## Economic cycles

- Macro matters
- Infrequent – once per cycle (post GFC, Euro Crisis, Brexit, Covid)
- Timing is key
- Difficult to achieve on consistent basis

#3

For illustrative purposes only.

# Over the long term, return potential from quality transition is higher than from compounders, but harder to capture

Source: Morgan Stanley/Invesco. Using index data for the period 30 April 2012 to 30 April 2022. This involves taking the constituents of MSCI Europe and segmenting them into 16 buckets, depending on their starting ROIC and ROIC five years later, with the first data point for the period 30 April 2012 to 30 April 2017. This is then done continuously on a monthly until 30 April 2022 and calculations done on an equal weighted basis. The returns for each bucket are then calculated and averaged. <sup>1</sup> ROIC quartile in Y0. <sup>2</sup> ROIC quartile in Y5.

# Profiling Quality Transition

## Charting the life cycle of a quality transition stock

For illustrative purposes only.

**Quality transition rarely happens in a straight upward line...**

- Requires discipline
- Patience
- Continuous active engagement

**...and can take various forms...**

- Restructuring/ re-organisation
- Capital allocation/capital investment
- Acquisitions/disposal
- Changing industry/market dynamics
- ESG improvement

**Once the Quality transition driver/s have played out, the characteristics of the stock change & typically become more 'compound like' in nature. Our IRR analysis is integral throughout.**

# A Disciplined Investment Process

# Investment process

Converting a universe of over 600 companies into a portfolio of approx. 50 holdings and a number of watchlist companies.

## Unstructured idea generation

- Investment team
- Daily Huddle
- Trusted 3<sup>rd</sup> parties
- Monthly HIC & Global Ideas Group
- Conferences

## Structured idea generation

- Fortnightly meetings:
- Quant screens
  - Valuation database
  - Performance analysis

Our aim is to generate a **consistent flow of stock ideas** to be researched

For illustrative purposes only.  
There is no guarantee that these objectives will be achieved.

# Investment process

Idea  
Generation

Fundamental  
Research

Portfolio  
Construction

Active  
Ownership

## Business Analysis

### Industry Dynamics

Market growth, market share & competition, barriers to entry

### Financial Analysis

ROCE evolution, balance sheet, cashflow dynamics

### Capital allocation

Sustainable capex, growth vs M&A, shareholder returns

### Management Quality

Capital allocation, Governance and ESG awareness, meeting feedback, incentivisation

## Investment Thesis

### IRR comparison

Recorded and continuously monitored

### Quality transition drivers

Identify key drivers of change

### Valuation model

To generate fair future multiple for the business. Importance of growth, multiple, shareholder returns to the valuation

### Probability Assessed

Upside vs. downside potential

**All aspects of research are debated across the team throughout the research process, not at completion**

The European Equities team typically undertake 400 company meetings each year with around 50 of these meetings with companies not owned. Approximately 350 meetings per annum with sell side analysts, strategists and economists.

For illustrative purposes only.

# Investment process

## Understanding our IRR analysis

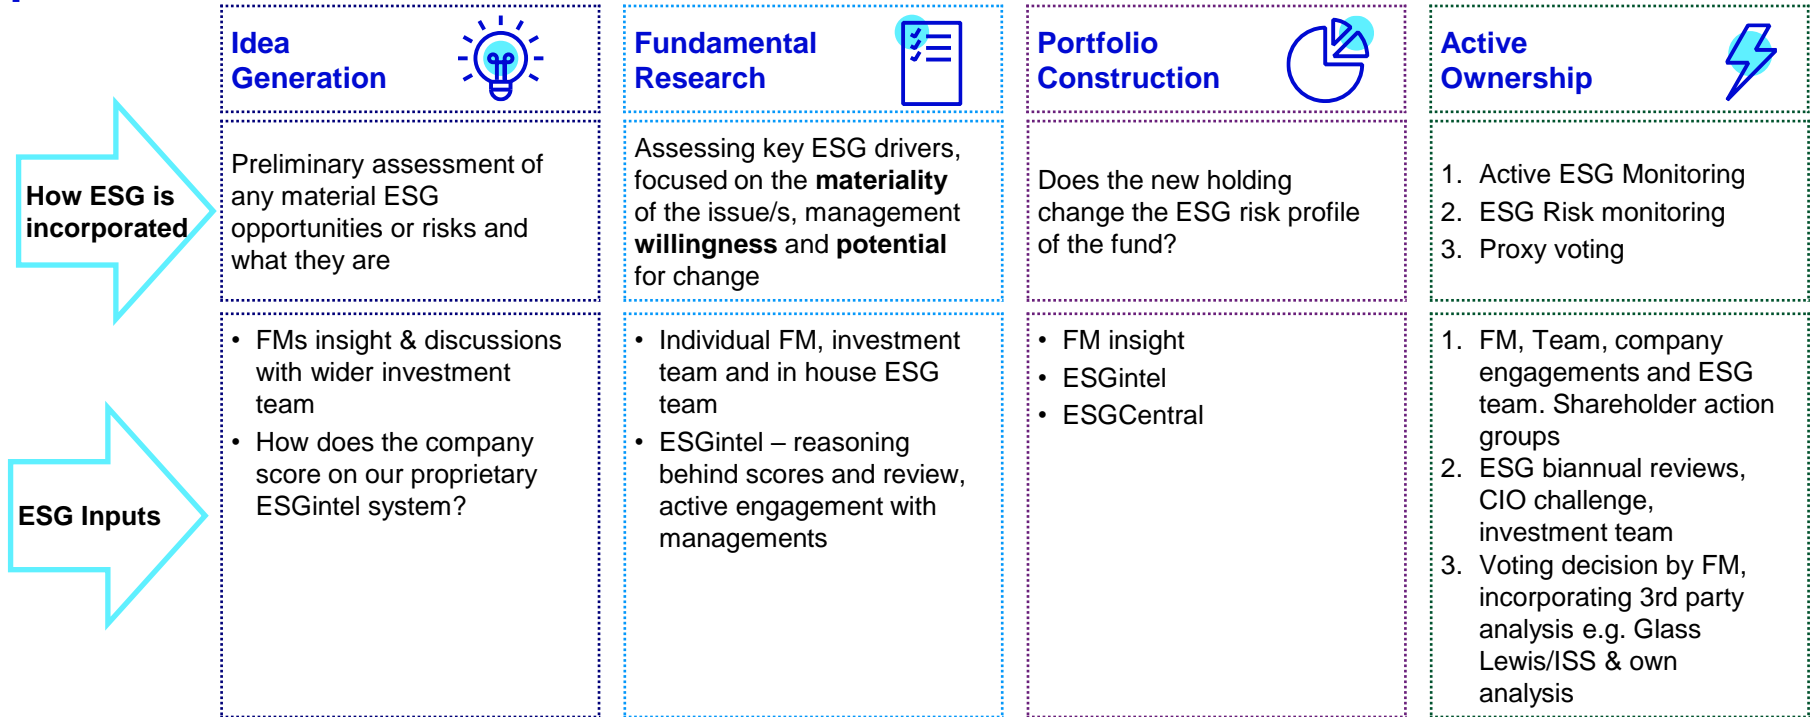

### Theoretical examples of our IRR analysis

Company	What type of investment is it?	Current P/E	Exit Multiple (Trailing)	Change in Exit Multiple	Estimated 3-yr EPS CAGR	Payout Ratio (%)	Implied 3 year IRR CAGR % (Annual total return)
A	Improving industry dynamics	10.3x	11.0x	➔	15%	50%	24%
B	Change in capital allocation	14.7x	15.0x	➔	11%	50%	16%
C	M&A/divestment	9.7x	14.0x	⬆	10%	40%	30%
D	Re-organisation	9.5x	15.5x	⬆	4%	70%	29%
E	Product re-alignment	18.4x	20.0x	➔	15%	40%	21%

For illustrative purposes only.

# ESG leverages our quality change approach throughout the investment process

For illustrative purposes only.

Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to [www.invescomanagementcompany.lu](http://www.invescomanagementcompany.lu).

# Investment process

Idea  
Generation

Fundamental  
Research

Portfolio  
Construction

Active  
Ownership

## New idea

Key influences on position size:

- How does the idea enhance the portfolio?
- Valuation comparison: IRR
- Impact on risk and factor characteristics?
- ESG characteristics?
- Watchlist or purchase?

## A diversified Portfolio with active positions

- Approx. 50 names
- No formal limits on country, sector or style exposure
- No formal limits on position sizes
- Top 10 holdings: 25% to 30%
- Minimal cash levels

## Inputs

- Quantitative tools include Northfield risk model & StyleAnalytics: TE, stock specific and factor risk
- Investment Oversight Team
- **Fund manager ultimate decision maker**

For illustrative purposes only.

# Active ownership

## Stock monitoring

Idea  
Generation

Fundamental  
Research

Portfolio  
Construction

Active  
Ownership

### Position sizing

- Our confidence in the delivery of the individual drivers will determine the potential upside/downside. This will have an influence on positioning at a stock level
- Monthly meeting to review IRR, performance and earnings momentum

### Sell discipline

- Another stock with better risk/reward characteristics
- The quality transition drivers are fully appreciated in the valuation
- Investment thesis: delivery of some or all of the key drivers have failed to materialize
- Not a formulaic decision but considered on a case-by-case basis, collaborating with others as appropriate

**Avoid thesis creep through the collaborative and repeatable process**

For illustrative purposes only.

Data as at 31 August 2024. \*Periods greater than one year are annualised. Fund (Z EUR Acc) performance figures are shown in EUR, inclusive of reinvested income and net of the ongoing charges and portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. Sector average performance is calculated on an equivalent basis. Index: net return in EUR. Quartile Ranking represents the fund performance ranking in the Morningstar peer group sector. 1 means the top 25%, and 4 the bottom 25%, of the sector. The performance data shown does not take account of the commissions and costs incurred on the issue and redemption of units.

# Summary

# Invesco Pan European Equity Fund

## Fund characteristics

Past performance does not predict future returns.

<b>Investment approach</b>	Active, valuation-led, bottom up investment approach with macro overlay Strong emphasis on valuation, a key determinant of future returns Long-term approach, typically with 3 to 5 year investment time horizon The Fund aims to provide long-term capital growth by investing in a portfolio of equity or equity related instruments of European companies with an emphasis on larger companies
<b>Investment style</b>	No style bias. Investment team try to target the best mix of individual risk / reward opportunities at any point in time
<b>Reference benchmark</b>	MSCI Europe Index (Net Total Return) Flexibility to have off reference index exposure
<b>No. of holdings</b>	59
<b>Current fund size</b>	€1.38 billion
<b>Market cap size</b>	Holdings typically range from €1bn to over €50bn. Flexibility to invest in companies with a market cap of less than €1bn

**Invesco Pan European Equity Fund**  
Annualised returns, gross of fees in EUR (%)

Source: Invesco as at 31 August 2024. Fund performance figures are shown in EUR, inclusive of reinvested income, gross of ongoing charges and net of portfolio transaction costs. The figures do not reflect the entry charge paid by individual investors. Index: total return, in EUR. Please see Net Performance slide for the impact of ongoing charges. As the Fund is actively managed, it is not intended that the performance of the Share Class will track the performance of MSCI Europe Index (Net Total Return) (the “Benchmark”). The investment concerns the acquisition of units in an actively managed fund and not in a given underlying asset. Returns may increase or decrease as a result of currency fluctuations.
